FONOGRAMS

FOR 1961

WEBCOR **stereofonic** **high fidelity** **FONOGRAPHS** **FOR 1961**

WEBCOR—The great pioneer in sound electronics, never stops searching for new ideas, new products to make listening more enjoyable. The 1961 WEBCOR line represents the ultimate in styling, the greatest in functional design, and truly, the best in dramatic listening pleasure. A WEBCOR is built to last, built to perform and built to satisfy. A demonstration will convince you that—all music sounds better on a WEBCOR—by far.

Everyone's First Choice
In Stereofonic High Fidelity

webcor MODERNE

STEREO HIGH FIDELITY FONOGRAP

MODEL 1068

The Webcor "Moderne" is the most outstanding of Stereo consoles. It offers the finest Stereofonic sound from the new Stereo records. And, the "Moderne" gives a new realism to the regular LP high fidelity records. The "Moderne" will enhance the decor of any room in the home.

SPECIFICATIONS

40-15,000 cycles frequency range • 30-watt dual-channel amplifier, 15 watts per channel • 5 oval speakers—one 10" woofer, two 6" mid-range, and two 4" tweeters with crossover network and BFD (Bass Frequency Distribution) • Ceramic Stereo cartridge with .7 mil diamond stylus for LP records, and sapphire stylus for 78 RPM records • 9 tubes including rectifier • Diamond needle • Automatic shut-off • Automatic 4-speed record changer • "Dual-gang" volume, treble and bass controls • Provisions for Webcor "Drop-In" AM-FM Stereo, AM, or FM tuner • Five speakers • Record storage compartment • 45 RPM spindle included • Front mounted "Stereo Audio Balance Control" • Channel 1 and 2 external speaker outputs and external amplifier outputs

fonographs

NEW WEBCOR BFD BASS FREQUENCY DISTRIBUTION

Webcor's new Bass Frequency Distribution (BFD) effectively creates a new *third* Stereo channel. Low frequency bass notes from either channel on the stereo record are routed through the large bass woofer speaker mounted in the center of the sound chamber, giving you a continuous wall of sound between the two channels. The result—BFD—three channel stereofonic sound.

WEBCOR AMPLIFIERS AND SPEAKERS

Webcor Stereo Fonographs sound better because Webcor engineers have constantly developed better amplifier and speaker systems. Webcor dual-channel amplifiers reproduce all tones with adequate power and wide range frequency response. The superior quality of Webcor speaker systems results in superior high fidelity sound reproduction.

WEBCOR AUTOMATIC STEREO-DISKCHANGERS

Webcor's Stereo-Diskchanger plays both Stereo

and Monaural records, at all four speeds. 33 1/3 rpm 10" and 12" records may be intermixed. "Anti-rumble ribs" absorb vibration for negligible rumble.

FEATURES OF THE WEBCOR STEREO AM-FM RADIO

- Push-type AFC (automatic frequency control) locks the station on the strongest FM signal and prevents station drift.
- Separate antennas—a low impedance loop for AM and dipole antenna loop for FM—are standard equipment on Webcor radio Fonographs.
- Rotating tuning knob with flywheel action for quick, exact tuning for both AM and FM.
- Precisely calibrated tuning dial for easier selectivity.
- Full wave silicon diode rectifier provides many hours of trouble-free performance.

webcor MELODY HI-FI FONOGRAP

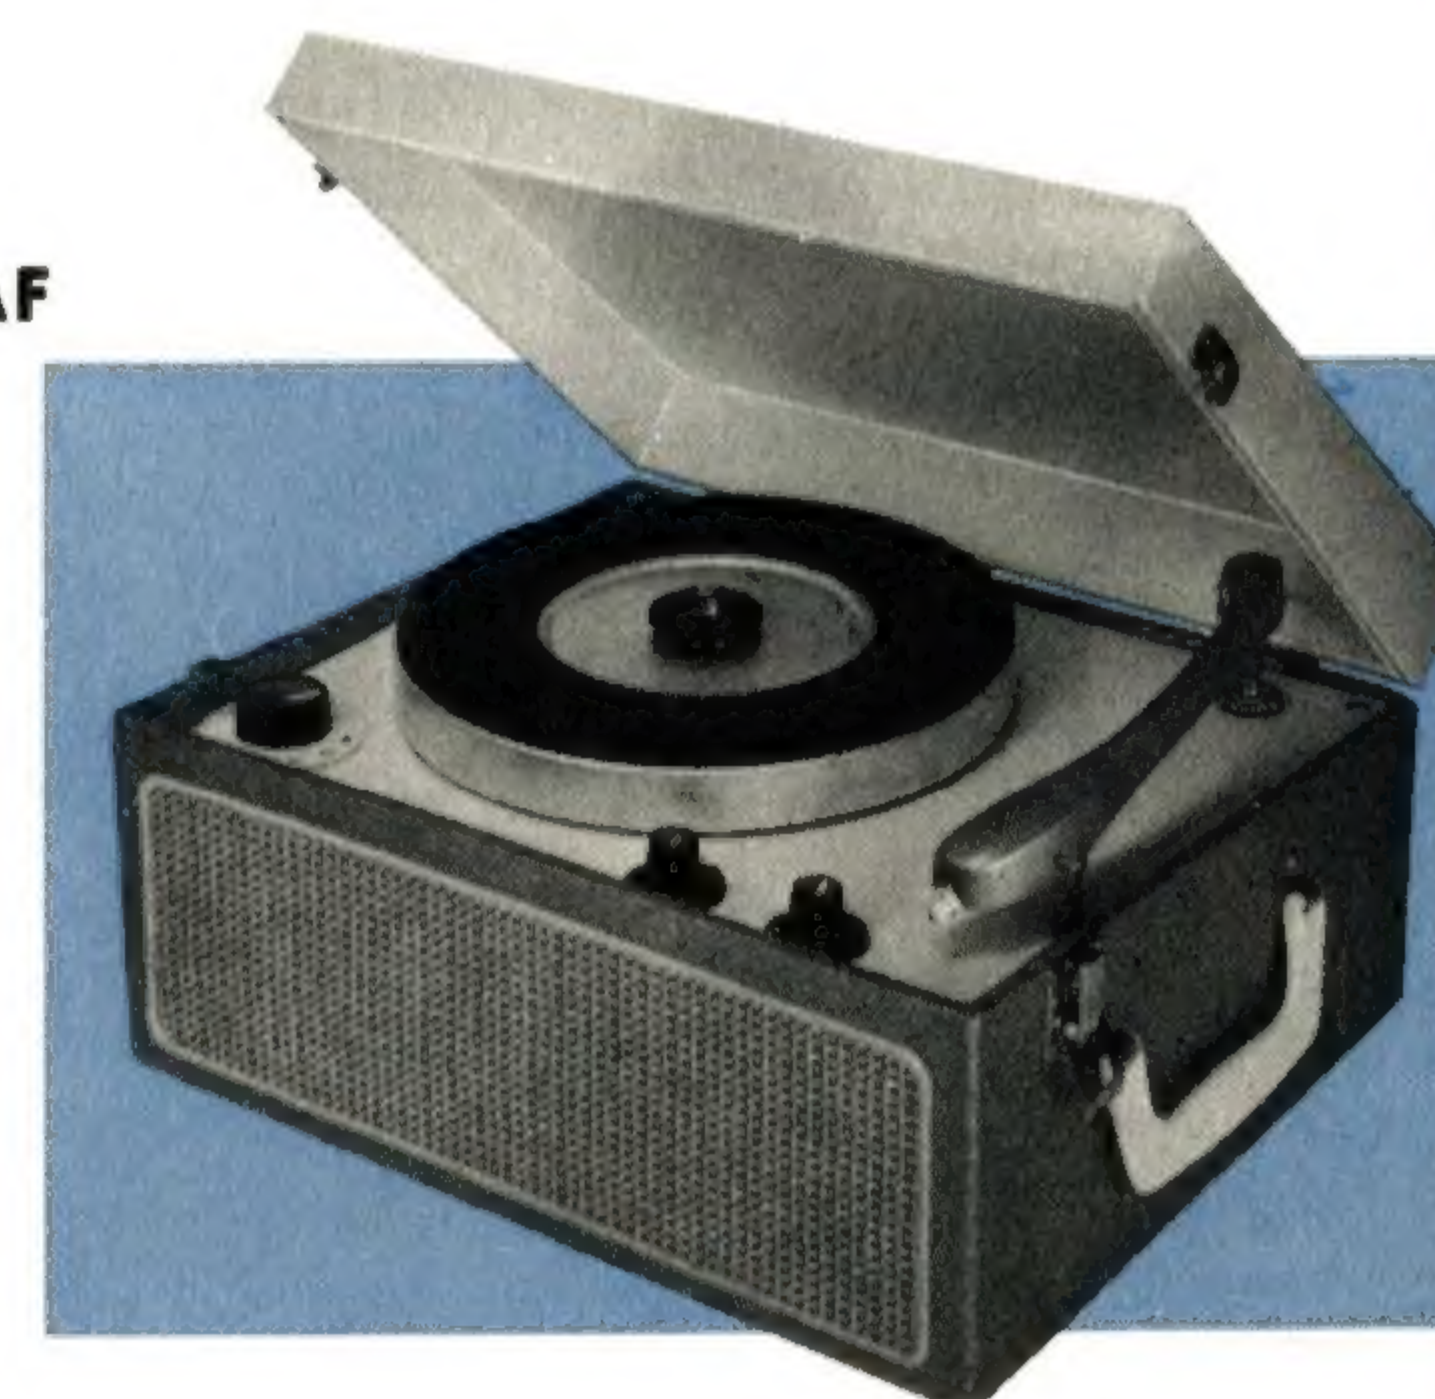

MODEL 1112

Here is unquestionably the finest low-price Manual Fonograf made! The 1961 Webcor "Melody" is designed and engineered to give precise and thrilling reproduction.

SPECIFICATIONS

Plays all four speeds, 16 2/3, 33, 45, and 78 rpm, and all record sizes, 7", 10", and 12" • Wide-range, turn-over cartridge • Wide-range, permanent magnet speaker • Separate volume and tone controls
